

Hello!👋 This is a free editable D&D 5e character sheet.

You can see it in action and learn about it [in this video](#).
(I made these sheets for my own use, based on what information I use and when I use it during a game session. I created these in photoshop but since so many people showed interest in them, I decided to make a version that was way more accessible to anyone and everyone!)

INSTRUCTIONS:

Use a browser (not the app) for this doc to operate correctly.

1. Create a copy of this sheet to your own drive by clicking File > Make a copy
2. In your copy of this file you can edit the text above each character sheet as you would in any other document.
3. For text *inside* the sheets, double click on the sheet images to be taken to an editor that will allow you to edit the *editable text* within the character sheet image.
4. **You can freely add new text boxes by using the T tool in the toolbar! Customize to your needs!**

This sheet is designed for printed paper use. If there's enough interest, I can create a fully functional digital version with color and paper textures. So please let me know on the [Discord](#), or in the [comments of this video](#) if you are interested!

DM me if you have any questions on using this or find any errors.

Happy gaming! 😊
